

Fishes of Lake Thunderbird

Many fish species live in Lake Thunderbird. Most are natural inhabitants of the creeks that flow into the lake; a few species are stocked by the Oklahoma Department of Wildlife Conservation (ODWC) to support game and sport fishing. Lake Thunderbird is home to:

Largemouth Bass	Longnose Gar
Spotted Bass	Spotted Gar
White Crappie	Freshwater Drum
Black Crappie	Common Carp
Saugeye	Smallmouth Buffalo
Blue Catfish	Bigmouth Buffalo
Channel Catfish	River Carpsucker
White Bass	Yellow Bullhead
Flathead Catfish	Gizzard Shad
Bluegill Sunfish	Inland Silverside
Green Sunfish	Red Shiner
Warmouth Sunfish	Mosquitofish
Redear Sunfish	Bluntnose Minnow
Longear Sunfish

The Lake Thunderbird Watershed Alliance was formed in 2020 to work collaboratively with residents, communities and other stakeholders to protect the water quality of Lake Thunderbird. The LTWA also serves as a clearinghouse for Lake Thunderbird watershed-related implementation projects, research and outreach.

For more information about the LTWA visit the website at <https://LTWAOK.org>
